

TridentRise Service Model & Investment

A reference document outlining how TridentRise services are organized, what each stage covers, and the standard investment for each. This is a stand-alone reference — separate from the project workspace — for clients who want to understand the structure and economics of the offering.

How TridentRise services are organized

TridentRise services organize into four stages. Most engagements start at Stage 1 ; later stages are optional and added only when relevant. Every stage is configured to the client's specific practice — the underlying platform is shared, the configuration is one-of-one.

Stage	Name	Standard investment (CAD)
1	Initial Build	\$7,500 one-time
2	Ongoing Operations	\$2,500 – \$3,500 per month
3	Strategic Expansion	Scoped per project
4	Embedded Leadership	\$10,000 per month, 6 – 12 months

Stage 1 — Initial Build

\$7,500 CAD, one-time. Approximately four weeks.

The work to take a client from zero to a working engine producing real leads on cadence.

What's delivered:

- Calibrated ICP for the client's practice focus
- Intent-signal source list, configured
- Scoring engine, calibrated to client wins
- Biweekly briefing email shipping to client inbox
- Pipeline visibility dashboard live at a dedicated subdomain
- Runbook documenting ongoing operation

Typical payment terms: 50% on signing, 50% at handover. 5% discount if paid in full at signing.

Stage 2 — Ongoing Operations

\$2,500 – \$3,500 CAD per month.

The engine kept running, tuned, maintained, and reported on after the Initial Build is complete. For clients who want TridentRise to keep the engine humming rather than operate it in-house.

What's included:

- Source maintenance — when sources change format or new feeds emerge
- Monthly scoring rubric tuning based on feedback signals
- Bug fixes and minor feature additions
- Monthly 30-minute performance review
- Written monthly performance report
- All infrastructure costs included
- 24-business-hour response on email or Slack

Two tiers:

- **Basic — \$2,500 / month.** For clients who need the engine running with light strategic touch.
 - **Strategic — \$3,500 / month.** For clients who want more monthly strategic time and faster iteration cycles.
-

Stage 3 — Strategic Expansion

Pricing varies based on scope. Discussed per project.

Adds new segments, deeper integrations, or training extensions to a running engine. Common examples:

- **New segment configuration** — adding a second target market to the engine (different sources, scoring weights, voice samples). Roughly \$2,000 – \$4,000 CAD per segment.
 - **AI Readiness Workshop — \$3,500 CAD, one-time.** Half-day session on how AI fits into the broader business beyond lead-generation.
 - **Custom integration** — connecting the engine to a specific CRM, marketing platform, or workflow tool. Scoped per request.
-

Stage 4 — Embedded Leadership

\$10,000 CAD per month. 6 to 12 month engagement.

TridentRise embedded as the client's acting head of sales. Full revenue-leadership role for clients who need a real VP Sales but cannot yet hire one.

What's included:

- Day-to-day sales leadership
- Pipeline management and forecasting
- Hiring support if scaling the team
- Deal-by-deal close support
- Quarterly board reporting

This is the most substantial commitment in the menu. Most clients reach this stage only after running with Stages 1 and 2 for several months.

Optional add-ons (à la carte)

Add-on	Investment (CAD)
Additional segment configuration	\$2,000 – \$4,000 (one-time per segment)
AI Readiness Workshop	\$3,500 (one-time)
Custom CRM integration	Scoped per request

Notes specific to PRmediaNow

PRmediaNow is the inaugural paying-client engagement for the TridentRise productized service. The following adjusted terms apply specifically to this relationship:

- **Stage 1 (Initial Build): waived.** The work to build PRmediaNow's engine is delivered at no cost. PRmediaNow receives the full build — engine, dashboard, runbook — without the standard \$7,500 fee.
- **Stage 2 (Ongoing Operations): discounted.** If PRmediaNow elects to have TridentRise operate the engine going forward, the monthly rate is discounted from the standard range. Specific terms to be discussed.
- **No commitment before value is delivered.** Sign-off only happens after PRmediaNow has seen real engine output and made an informed decision.

These terms reflect the mutual benefit of the first-engagement relationship. The case study, the refinements, and the operational learnings that come out of this build become the foundation for every TridentRise engagement that follows.

What is not included

For clarity, the following items are out of scope unless otherwise agreed:

- Outbound execution — the engine drafts; the principal sends
- CRM platform subscription costs (HubSpot, Pipedrive, etc.)
- Third-party data subscriptions if added optionally (Apollo, Hunter, Sales Navigator)
- Legal, accounting, or compliance services

This document is a reference. Specific engagement terms are agreed in writing before any work b
